SKILLS

- C#, .NET 8.0, .NET Framework 4.8, MudBlazor
 - AWS Lambda, Amazon EventBridge, SQS
 - Node.js, TypeScript (Limited Exposure)
 - Git
 - MSSQL, DynamoDb
-

PROFESSIONAL EXPERIENCE

CYS Global Remit Pte Ltd

Jul 2025 - Now

Software Developer

- Maintain and enhance production systems across legacy ASP.NET Web Forms, .NET Framework 4.8, and modern .NET 8 / .NET 9 services.
- Designed and implemented serverless APIs using AWS Lambda and Amazon EventBridge to support incremental modernization of legacy systems.
- Developed backend services integrating with Bank APIs and external payout providers, supporting payment workflows.
- Built APIs for reporting and document processing, supporting operational and regulatory processes.
- Introduced unit testing for new services to improve reliability and regression coverage.
- Collaborated directly with the CTO on system design decisions and modernization strategy.

NCS

Apr 2024 - Mar 2025

Application Support Engineer

- Supported enterprise systems following cloud migration to AWS, focusing on application stability and environment readiness.
- Assisted with application deployments and environment management across Windows and Linux platforms.
- Worked with development and QA teams to support CI/CD pipelines and release coordination.
- Investigated system alerts and incidents, performing root-cause analysis and issue resolution within SLA requirements.
- Contributed to deployment automation and version control processes using DevOps practices.

Accenture

Apr 2022 - Apr 2024

Application Developer (Contract)

- Supported enterprise applications built on low-code platforms (PEGA 8.3) within Agile delivery teams.
- Implemented workflow logic, UI components, and system integrations using REST APIs and SFTP.
- Assisted with requirements clarification, testing, and UAT support in collaboration with business stakeholders.
- Provided application maintenance and defect resolution across multiple project streams.

Government Research Grant Project

Sep 2019 - Sep 2021

Project Engineer (Contract)

- Led a 5-member team to design, build, and sustain lab-scale HF membrane production for a government-funded research initiative.
 - Coordinated project execution, experimentation, and documentation under grant-funded research objectives.
-

EDUCATION

National University of Singapore

2016 - 2019

Bachelor's Degree, Chemical Engineering
